

Experts in School Safety & Security

**We Prevent
School Threats**

School Access Manager

School Access Manager (SAM) delivers a unified voice security firewall in addition to our threat prevention programs. It prevents/reduces vishing, phoned-in bomb threats, social media threats, threats left on notes in schools, bank fraud, ransomware - all through an affordable program that scales to any size.

BOMB THREATS & OTHER UNWANTED THREATS

Most schools are not protected against newly developed threats. We all protect our cloud and internet data but most fail to protect the fastest-growing risk of 2021 - Bomb Threats? Districts are now learning that it is equally as important to protect our voice networks. Here's why!

An average school district losses 7,000+ instructional hours per phoned-in threat

The average cost for a school district is \$45,000 per vishing threat

Threats have a long term impact on student outcomes and well being

School Access Manager has partnered with Cisco to provide a unique solution specifically designed for school district to protect against these threats.

Easy Installation

SAM (School Access Manager) interfaces to standard voice gateways/phone systems and does not rely on any proprietary hardware.

SAM maintains a global threat database with over 1.5 million known voice threats. On average, an additional 20,000-40,000 voice threats are discovered each day.

SAM has a small application which interfaces to your schools voice system that provides call data and logic. The system is designed to continue to operate. even if you experience a network outage.

"We thought we were protected, we had a firewall. **Antivirus, WebDNS Filter, email attachment scanning, two-factor authentication.** We **still got hit**. We now realize we needed SAM's Vishing firewall to prevent vishing attacks. The attackers used **vishing** and were able to bypass all of our other protection.

To make matters worse, we told the board and the public that we had to spend money to prevent us from being attacked, **we spent it and we still were hit**. You can never protect yourself 100% but I wish I knew about SAM prior, I would have included it in my requirements. On a side note, I really like the way they price the product, it makes budgeting very simple. "
