

911 SWATTING CALL

Preventing and Reducing Swatting In 911 Centers

Overview of preventing and reducing swatting in 911 centers using SAM-911, an innovative tool that enhances public safety by intercepting false emergency reports.

SAM 911

SAM-911 is an innovative tool to enhance public safety by preventing swatting calls from reaching 911 centers. Swatting calls are false emergency reports that can create significant disruptions and dangers. Here's how SAM-911 protects various sectors:

HOMES

Ensures the safety of individuals and families by reducing the risk of unnecessary emergency responses, which can lead to hazardous situations.

POLITICIANS AND POLITICAL GROUPS

Safeguards individuals involved in the political process from being targeted due to their public roles or political beliefs.

PLACES OF WORSHIP

Keeps churches, mosques, and temples safe from threats called into the 911 center. Preserves the sanctity of religious and communal spaces by preventing threats that could disrupt the freedom to worship.

SCHOOLS

Protects educational environments from swatting calls directed at the 911 center, ensuring students and staff can learn and work without fearing unwarranted emergency interventions.

GOVERNMENT OFFICES

Maintains the security of crucial public services and institutions essential for societal functioning and governance.

STORES

Enhances the safety of employees and customers in commercial areas, which are often public and heavily trafficked, making them vulnerable to swatting attempts.

OTHER GROUPS

Supports the security needs of other public or private entities that rely on the integrity of emergency services for their operations and the safety of their communities.

A CORE TECHNOLOGY FOR EVERY 911 CENTER.

01

SAM-911's advanced pattern recognition capabilities allow it to accurately distinguish between genuine emergency calls and those intended to deceive or cause harm. This ensures that emergency resources are efficiently allocated to actual emergencies, enhancing the effectiveness of emergency services.

02

While SAM-911 effectively prevents swatting calls from reaching 911 centers, schools may still receive direct swatting calls. We offer additional tools to address this, such as SAM Voice for Schools, SAM AirDrop, SAM Email Filters, and SAM Education. These solutions are tailored to the specific safety needs of educational settings, ensuring comprehensive protection against swatting and other threats.

Redefining Public Safety with **SAM-911**

Our approach to preventing swatting in 911 centers marks a significant step forward in enhancing public safety. By leveraging advanced technology and proactive measures, SAM-911 offers a comprehensive solution to intercept false emergency reports, reducing disruptions and dangers in various sectors.
