FAKE SCHOOL THREATS IN THE UNITED STATES, 2021–2026

\$1.97B

Cost to taxpayers

39,775

Schools impacted

35.5M

Students impacted

Source: TDR Technology Solutions, The Real Cost of Preventable School Threats, 2021–2026. A school or student affected by more than one threat is counted once per threat.

THE PROBLEM

A hoax is not harmless. Every threat has a real cost.

A fake school threat still means a real lockdown. Instruction stops, lesson plans fall behind, and lost class time is hard to recover, putting the academic goals your district is working to meet at risk.

144M

Student instructional hours lost to fake threats, 2021–2026

432 of 435

Congressional districts with a fake school threat, 2021–2026

31%

Of 2025–26 taxpayer cost was the lasting mental-health impact on students

SAM Student Privacy Engine

BUILT INTO SAM

Student data never leaves your district.

Most vendors store student data and work hard to protect it. SAM takes a different approach: it strips student data out before a threat is evaluated, shared or reported, so there is nothing to expose.

1

Sanitized before evaluation

Student names, emails and records are removed first. SAM evaluates only the sanitized threat.

2

Stripped before police see it

Investigators get what they need to trace the sender and judge credibility. The unredacted original stays with the school, available on request.

3

Never in a notification

Alerts to your security team and administrators carry no student data. Authorized staff view the original inside the district.

✓ Meets or exceeds state student privacy laws, plus FERPA, COPPA and PPRA.

Student and staff safety

Every threat, fake or real, is acted on. SAM evaluates it faster and builds the case for prosecution, even when it never disrupts a school.

 Educate Posters and videos on criminal penalties and financial liability deter threats before they start. SAM Education Program	 Prevent Screens phone, email and 911 lines and stops hoaxes before they disrupt instruction. SAM-Voice · SAM-Email · SAM-911	 Reduce disruption Your team and police see quickly whether a threat is credible, so instruction resumes sooner. Credibility in one view	 Connect Spots the same threat across districts and links the people handling it. Never shares student data. SAM Threat Engine	 Prosecute Preserves evidence from day one and hands investigators a complete case for restitution. SAM-Law Enforcement · Evidence packets

THE PRODUCTS

FOR SCHOOL DISTRICTS

SAM-Voice IMPROVED

The electronic SRO for the phone system. Screens calls for swatting and called-in threats on Cisco and Webex calling.

SAM-Email NEW

Screens district email before a threat reaches an inbox. Quarantines, never silently deletes. Google Workspace, Microsoft 365, Cisco Secure Email.

SAM Threat Engine NEW

Compares your threat with other districts' threats, so you know instantly if it is part of a larger campaign, and gives you the district and police contacts to determine credibility faster. Especially valuable for social media threats.

SAM Education Program

Deterrence posters on criminal penalties and financial liability, plus videos for students and staff.

FOR LAW ENFORCEMENT AND 911

SAM-911

Helps 911 centers identify and intercept swatting calls before dispatch.

SAM-Law Enforcement PILOT

Evidence preservation from day one, a records-request checklist, link analysis across accounts and devices, and case organization through disposition.

Evidence packets

Each incident packaged with its records, documented costs and victim counts, ready for restitution and sentencing.

Deployable on agency premises, so case data stays in the agency's custody.

School products starting at **under \$2.00** per student per year, plus installation and support.

\$1.97B

Taxpayer cost, 2021–2026

Your school stays in charge.

Every threat gets a response. SAM puts what your team and law enforcement need in one place, so fake threats are identified and stopped with less disruption, real threats get a faster response, and investigators receive everything in a single handoff.

On-premise by design

SAM runs inside the district or agency, and its student privacy engine keeps student data from leaving the district.

Credible or not, quickly

SAM gathers the call, email or message and its sender details in one view, helping your team and law enforcement determine faster whether a threat is credible.

A simple handoff to police

When a threat needs law enforcement, SAM hands over an organized evidence packet in the format investigators use, so no one rebuilds the case from scratch.

The whole landscape, daily

Our School Threat Pipeline monitors incidents at more than 120,000 schools every day, so detection reflects this week, not last year.

SECURITY AND COMPLIANCE

All 50 states and federal. Meets or exceeds student privacy law, including FERPA, COPPA and PPRA.

NIST SSDF. Secure development practices, with a software bill of materials for every release.

Law-enforcement ready. Agency deployments follow CJIS and 28 CFR Part 23, with one-way controlled sharing from schools.

Cisco DevNet Partner. Built on Cisco's supported calling and email interfaces.

Every threat you prevent is a lockdown that never happens.

Talk with us about a pilot for your district, state, agency or community organization.
